Dear Parent,

### Authorisation for Use of Club Photographic Images

During the course of the season photographic images are taken of players in all age groups both in the form of action shots during matches and static team photos.

These photos are unable to be taken, or used, for any purpose without the prior consent of parents.

With the completion of the Club's website in 2005, parents of every player completing a registration form for season 2005-06 were asked to provide their consent to photographs of their child being used on the Club website or other official Club publication, or indeed their wish not to.

Parents of any new players entering the Club in subsequent seasons are therefore asked to do the same.

No names of players will be disclosed on any photograph used.

Consent is of course completely voluntary and, should you not wish to give your permission, adjustments will be made to any photograph featuring your child in order that he/she cannot be identified.

Please could you therefore complete the remaining section of this document. A copy will be retained by the Club for the duration of the season for which consent has been granted.

Yours sincerely,

**Wayne French**

Chairman
